

Hosted Online Safety Training Solution

This powerful user friendly Learning Management Solution (LMS) comes fully loaded with over 50 interactive safety and environmental courses that can be used immediately to provide training required by OSHA, WHMIS and other safety training standards. The high quality easy to follow courses were designed by Environmental, Health & Safety (EHS) professionals with many years hands-on experience working in diverse manufacturing, distribution, retail and health care environments. Our comprehensive LMS offers an effective and easy way to deliver safety training across the entire enterprise while providing instant access to accurate safety training reports for workplace audits.

Hosted Online Safety Training Solution

The Online Safety Training Solution is a hosted service that is managed by us. It does not require any specialized software installation, new hardware or IT resources on the client's part. All future new courses and improvements are automatically available on our client's sites at no cost at all so you will never have to worry about upgrading to keep up with new versions again. This online system is always available 24/7/365 globally via a simple internet connection and an Internet Explorer browser.

Safety & Environmental Training Courses Available

Above is a list of our professionally created courses that are available on our Online Safety Training Site. Required courses can be taken by employees 24/7/365 from any computer with an internet access. Most courses include quizzes and a student must get at least 70% to pass. Student scores are automatically tracked on the online training site and reports can be easily and quickly generated to evaluate performance and for OSHA recordkeeping compliance. Employees can also print of Certificate of Completion for their records after they successfully pass a course.

Safety Training Made Simple & Cost Effective

Our solution makes safety training management and compliance easy. Start-up is simple and you can literally use your site within hours of subscribing. This system will allow employees to access required training 24/7/365 globally and for you to easily access and track training thus making compliance easy. Our courses will also enable you to improve safety at your facility while reducing your training costs.

Numerous Reports

Administrators can monitor employee safety training, view safety training reports and download Excel reports from any computer with an internet access. No special hardware and software is required and Admins don't need any special IT knowledge or support to manage the site. Furthermore, since most required safety courses are readily available, Admins will not have to spend valuable time developing training.
